MagneTight™ Flow System—Ready**

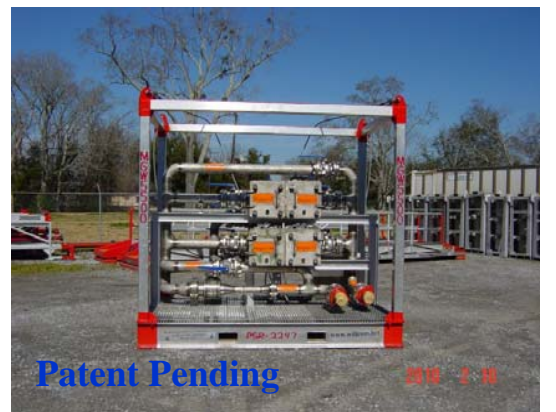

Metal & Iron Oxide from Magnet Cylinders

Check and Clean One Set 1st & Then Next

Check & Clean Magnets over 8" Drip Pan

Safely Remove Metals from Completion Fluids

MISSION STATEMENT

Petroleum Specialty Rental, LLC, was established in 1979. At that time, Petroleum Specialty was a small, specialty rental tool company servicing, primarily the Offshore Oil & Gas Industry. Drilling equipment

Morgan City, LA Facility

was the focus of our management during the early years. Emphasis was on top quality service and equipment maintenance, providing the best bottom line rentals possible for our clients. Today, we still regard the best value and bottom line for our clients as sacred. We have diversified our equipment rental line, so that we have become more of a specialty, environmental and safety equipment rental company that happens to own and rent drilling equipment too.

Petroleum Specialty Rental, LLC, has always been committed to search for the best and constantly add new equipment through research and development. Our environmental and safety equipment has been designed and developed with input from field experienced personnel that chose to advise and work with Petroleum Specialty Rental, LLC. The commitment

to provide quality, safe and environmentally sensitive equipment that benefits workers as well as operators in the oil & gas sector, has been the chief reason given why industry workers enjoy working with our research and development group. "They trust us to do the right thing and provide the best equipment, for them."

Most of the environmental and safety equipment we provide to clients, today, is considered a market niche, but "PRO-ACTIVE" type tools. We service all of the Gulf Of Mexico and much of the Louisiana inlands areas. Whereas all of our equipment is not being utilized internationally, as yet, we are continuing to ship more & more to foreign locations. Our company and equipment lines continue to grow and our "PRO-ACTIVE" ideas continue to blossom. Clients ask us to do special things to help assist them, and we do. That's what we do! We work with and help our clients to achieve success!
